FAR EAST

2. Army rotation between Korea and South China indicated:

Numerous troop trains carrying heavy equipment were seen moving north from Canton in December and January,

Almost equally heavy troop movements from the north were observed arriving in Canton during the same period.

Comment: These reported troop movements support indications [redacted] that a large-scale troop rotation between Korea and South China is under way. The armies believed to be leaving Korea are probably superior in equipment and training to those moving from South China.
